### Initiative on a page | Course Insights

**Drivers**
- UQ Strategic Plan 2018-2021 - Transforming our student experience
- UQ Student Strategy 2016-2020 - building our learning analytics capability
- UQ Learning Analytics Roadmap
- UQ Teaching and Learning Plan 2018-2021

**Scope**
Design, develop, trial and rollout a learning analytics tool that tracks student data at a course-level across all UQ courses.

**Aims**
Provides teaching staff with student data to enable them to make meaningful interpretations and to positively inform teaching strategies.

### Objectives
- Provide academics with a learning analytics tool that supports evidence-based teaching and learning practices.
- Consolidate data on students from multiple teaching and learning source systems.
- Maximise the reach and impact of learning analytics across UQ.
- Nurture a UQ-wide community of practice around Learning Analytics.

### Why
- Improve student learning outcomes by uplifting UQ’s learning analytics capability to provide timely, personalised feedback and analysis on how students are tracking with their learning.

### Aims
- Deliver a learning analytics tool that enables teaching staff to gain ‘actionable insights’ from student data through:
  - providing filterable and comparative student sub-cohort visualisations
  - providing analytics across the course lifecycle
  - facilitating the provision of personalised feedback

### Outcomes
- Co-designed with teaching staff
- Transition from development to operationalised through piloting and continual service improvement:
  - Pilot Sem 1, 2019 with 17 UQ2U courses
  - Pilot expanded Sem 2, 2019 to include additional 16 UQ2U courses and 10 volunteer courses
  - Operationalise tools to be supported by ITS and eLearning services
  - Further enhancements
  - UQ-wide rollout
